

PERSONAL INJURY CLAIMS

An elderly man slips on water spraying onto a sidewalk. A woman is scalded by hot water. A child mysteriously falls to her death after playing near a guardrail that has become loose from its supports. When tragedy causes injury or death, a lawsuit is usually not far behind.

Pacific Property Consultants are specialists in understanding the relevant building codes and maintenance requirements for homes, businesses and commercial property. We work closely with human factors experts and other team members to develop a cohesive understanding of how the accident occurred, and how the tragedy could have been prevented.
